## LANGUAGES

- English: B2

## PROFILE

I create user-focused digital experiences combining clean code with intuitive design. Skilled in HTML, CSS/Tailwind, JavaScript, and Figma, I turn ideas into responsive, accessible interfaces that enhance usability and visual appeal. I'm eager to contribute to projects where attention to detail and a strong sense of user experience make a real impact.

## EXPERIENCE

### Aurelia UI Kit - Design System

2025

UX/UI Designer

- Designed a complete design system in Figma with reusable components, typography, color palette, and interaction states.
- Created responsive layouts for web and mobile to ensure consistency and scalability across devices.
- Applied accessibility guidelines (WCAG) to improve usability and inclusivity in all components.

### Ubuntu - Organic Composting Landing Page

2025

UX/UI Designer & Front-End Developer

- Designed and prototyped a responsive landing page in Figma to promote sustainable composting and circular economy practices.
- Developed with Astro, SASS, and JavaScript, implementing clear call-to-actions and engaging visual storytelling.
- Applied UX principles to guide users through benefits, process steps, and community participation opportunities.

### Lúmina - Personal Portfolio Website

2025

UX/UI Designer & Web Developer

- Redesigned and rebuilt an existing portfolio using Astro, Tailwind CSS, and JavaScript.
- Prototyped in Figma with improved information architecture and navigation.
- Implemented a responsive, fast-loading design following UX and accessibility best practices.
